High-fi Prototype

High-Fidelity Mockup: The shopping cart lists the items that have been added to the cart, with the subtotal, tax, and total below it. At the bottom of the page, there is a clear call to action button that leads the user to the checkout page. This makes it easy for the user to navigate to the next step of the process, and finish their purchase. The colors also match the rest of the site, and the pastel color palette makes the site feel welcoming and happy.
